CAREER OBJECTIVE

I am a versatile Flutter and Web Developer specializing in creating user-friendly, scalable, and impactful digital solutions. My expertise spans mobile and web applications - from fintech wallets and e-commerce apps to online shops and automated contract platforms. With a strong foundation in Flutter, PHP, SQL, and modern web technologies, I deliver intuitive solutions such as digital wallets, farm and gym shops, charity sites, and automated contract systems. I bring together problem-solving, collaboration, and innovation to build digital products that drive efficiency and enhance user experience.

WORK EXPERIENCE

Flutter Developer, *Cooperative Mortgage Bank*   03/2018 – Current
- Implemented a digital wallet application, driving a 30% rise in user transaction volume within two months of launch.
- Developed account opening functionality, increasing user wallet creation and enhancing management efficiency by 25%.
- Implemented a fund transfer feature enabling direct deposits to unique account numbers, boosting transaction volume by 25%.

Flutter Developer, *Vendorhive360*   01/2023 – 05/2024
- Built a comprehensive e-commerce mobile app with user registration, secure login, and password recovery.
- Integrated shopping features such as cart and favorites, ensuring a smooth customer journey.
- Developed a secure checkout system with multiple payment options (cards, wallets, bank transfer).
- Added backend admin functionality to manage products and process orders.

Web Developer (Freelance Projects)
- Gym Online Shop: Designed and developed an online shop for fitness wears with secure checkout.
- Farm Online Shop: Built an e-commerce site for farm products with user-friendly navigation.
- Charity Foundation Site: Created a responsive website to support donations and outreach programs.
- Automated Contract Web App: Developed a digital platform for generating professional contracts automatically, simplifying business operations.
